

March 4th Susan Rouse Invite

Good morning coaches, last June we had our track resurfaced, and once the application was done we noticed the track was slippery when wet. We have jumped through numerous hoops and have had test performed over the last 5 months. We were assured that we would have a solution to this problem long before now, but that is not the case. We now have learned that the application they need to put down will not be done in time. With that being said our administration feels we should cancel this meet because we are unsure what the weather is going to do, and if we get any precipitation there are many events that would be unsafe to contest. I am truly sorry for this late notice, but I would rather caution on the side of safety for the kids. We have been assured that our April 1st meet will be fine we are praying that is the case. Cancelling this meet is a big financial burden for us that we truly regret has to happen. If anyone has paid already we will either refund your entry or apply it to April 1 if you are coming. Once again I truly apologize, however I thought it would be irresponsible to just hope for good weather and risk injuring an athlete.
